The Covid-19 pandemic has affected the hospital operations on moderate basis since healthcare is an essential service. The hospital had a low revenue during the months of April to May as a result of the lockdown situation in the country.

In future outlook, company is experiencing a high demand for inward and OPD services which will strengthen the financial position of the company.

Further, we have informed the Directors, Key Management Personnel and other related parties who have access to unpublished price-sensitive information, to take additional precautions in the event such parties intend to trade during the delayed period of information submission.
