Notes To The Interim Financial Statements

CORPORATE INFORMATION

INTERIM CONDENSED FINANCIAL STATEMENTS

APPROVAL OF FINANCIAL STATEMENTS

The interim condensed financial statements of the Company for the three months ended 31st March 2026 were authorized for issue by the Board of Directors on 28th May 2026.

BASIS OF PREPARATION

The interim condensed financial statements have been prepared in compliance with Sri Lanka Accounting Standard (SLAS) LKAS 34 - Interim Financial Reporting. These interim condensed financial statements should be read in conjunction with the annual financial statements for the year ended 31st March 2026.

These financial statements for the quarter ended 31st March 2026 have been prepared on a historical cost basis, except for land and buildings.

Comparative information

Comparative information including quantitative, narrative and descriptive information is disclosed in respect of the previous period in the Financial Statements in order to enhance the understanding of the current period's Financial Statements and to enhance the inter period comparability. The presentation and classification of the Financial Statements of the previous period are amended, where relevant for better presentation and to be comparable with those of the current period.

SIGNIFICANT ACCOUNTING POLICIES

The changes to accounting policies set out below have been applied consistently to all periods presented in these interim condensed financial statements and in preparing the opening SLFRS/LKAS, unless other indicated.

Finance costs

Net assets per share have been calculated, for all periods, based on the number of shares in issue as at 31st March 2026.

Finance cost comprise interest expense on borrowings.

Financial assets

Initial recognition and measurement
Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income (OCI) and fair value through profit or loss. A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

The financial assets include cash, trade and other receivables and loans and other receivables.

Subsequent measurement
For purposes of subsequent measurement, financial assets are classified in four categories
• Financial assets at amortized cost (debt instruments)
• Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt instruments)
• Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon de-recognition (equity instruments)
Financial assets at fair value through profit or loss.
• Financial assets at amortized cost (debt instruments)

Loans and receivables
Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate method (EIR), less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR.

The EIR amortization is included in finance income in the income statement. The losses arising from impairment are recognized in the income statement.

Derecognition
A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

The right to receive cash flows from the asset have expired
The company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the receivable cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either

(a) the company has transferred substantially all the risks and rewards of the asset, or

(b) the company has either transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all of the risks and rewards of the asset nor transferred control of it, the asset is recognized to the extent of the company's continuing involvement in it.

In the case, the company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the company has retained. Continuing involvement that takes the form of guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the company could be required to repay.

Impairment of financial assets
The Company assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired.

A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.

Events that has occurred after the initial recognition of the asset and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.
Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation and where observable data indicate there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Financial liabilities
Initial recognition and measurement
Financial liabilities within the scope of LKAS 39 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or

as derivatives as appropriate and determines the classification of its financial liabilities at initial recognition.

All financial liabilities are recognized initially at fair value and in the case of loans and borrowings, plus directly attributable transaction costs.

The financial liabilities include trade and other payables, bank overdrafts, loans and borrowings.

Subsequent measurement
The subsequent measurement of financial liabilities depends on their classification as follows:

Financial liabilities at fair value through profit or loss
Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Gains or losses on liabilities held for trading are recognized in the income statement.

The company has not designated any financial liabilities upon initial recognition as at fair value through profit or loss.

Borrowings
After initial recognition, interest bearing loans and borrowings are subsequently measured at amortized cost using the effective interest rate method. Gains and losses are recognized in the income statement when the liability are derecognised as well as through the effective interest rate method (EIR) amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in the finance costs in the income statement.

Offsetting of financial instruments
Financial assets and financial liabilities are offset and net amount reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

Derecognition
A financial liability is de-recognized when the obligation under the liability is discharged or cancelled or expires.

Financial risk management objectives and policies
The Company principal financial liabilities comprise of loans, borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the company's operations . The Company has trade and other receivables, and cash that arise directly from its operations. The Company is exposed to market risk, credit risk and liquidity risk.

The company’s overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the company’s financial performance. Risk management is carried out under policies approved by the Board of Directors.

Related party transactions
The Company has borrowed USD 1,000,000 from Universal Enterprises Pvt. Ltd on 06.09.2023 at a interest rate of 6.5% plus SOFR per month and USD 500,000 on 31.01.2025 and USD 400,000 on 24.10.2025 at a interest rate of 6.5% plus SOFR per month to fulfill the working capital requirements of the company and assist in the capital projects of the company. Universal Enterprises Pvt. Ltd. is the major shareholder of the company.
