FIRST CAPITAL HOLDINGS PLC

REVIEW OF OPERATIONS

First Capital Holdings PLC (the Group) recorded a Profit after Tax of Rs. 823Mn for the six months ended 30 September 2022 compared to Loss after Tax of Rs. 303Mn in the corresponding period of the previous year.

The Primary Dealer division reported a Profit after Tax of Rs. 1.1Bn for the six months ended 30 September 2022 (2021/22 – Loss after Tax of Rs. 414Mn). The Results include net interest income of Rs. 919Mn and a trading gain on sale of government securities amounting to Rs. 281Mn (2021/22 – Net interest income of Rs. 242Mn and a trading loss of Rs. 470Mn were included).

As at 30 September 2022, the Business division's Held to Maturity portfolio reflected a fair valuation loss of Rs. 945Mn which is not accounted for in the provisional financial statements since the amortised cost basis has been adopted in valuing the said investment as per the accounting standard on financial instruments (SLFRS 9).

We are operating in a challenging business environment due to the prevailing economic conditions. The impact of a potential local debt restructuring is also a significant concern.

The Corporate Finance division reported a Loss after Tax of Rs. 375Mn for the six months ended 30 September 2022 (2021/22 – Rs. 15Mn). Fair valuation loss on dealing securities amounting to Rs. 290Mn mainly resulted in the Loss for the period under review.

The Wealth Management division reported a Profit after Tax of Rs. 21Mn for the six months ended 30 September 2022 (2021/22 – Rs. 47Mn). The assets under management of the division stood at Rs. 36Bn as of 30 September 2022 (31 March 2022 – Rs. 41.2Bn).

6 FINANCIAL INSTRUMENTS- FAIR VALUE MEASUREMENT

The Company measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements in accordance with SLFRS 13.

Level - 1

Financial instruments that are measured in whole or in part by reference to published quotes in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Level - 2

Financial instruments that are measured at fair value on a recurring basis. As market quotes generally are not readily available or accessible for these securities, their fair value measures are determined using relevant information generated by market transactions involving comparable securities.

Level - 3

Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

6 FINANCIAL INSTRUMENTS- FAIR VALUE MEASUREMENT (CONTD.)

6.3 Measurement of fair values

6.3 (a) Valuation techniques and significant unobservable inputs

The following table shows the valuation techniques used in measuring Level 2 and Level 3 fair values, as well as the significant unobservable inputs used.

Financial instruments measured at fair value

Туре	Valuation Technique	Significant Unobservable Inputs	Inter-relationship between Significant Unobservable Inputs and Fair Value Measurement
Debentures	The valuation model is based on Yield Curve of the Government Securities. Yields relating to Government Securities based on the remaining maturities of the respective debentures is interpolated in the valuation considering the investee companies' risk premiums.	Risk premium of the investee companies (lies between 3.27% and 6.44%)	The estimated fair value would increase/decrease if risk premium of the investee company is lower or higher
Unit Trusts	The fair values are based on the Net Asset Values published by the respective unit trusts.	Not applicable	Not applicable
Equity Securities (Financial assets - fair value through other comprehensive income)	The fair values are based on price to book value approach (PBV 1.0 times).	Discounting factor used to arrive the unlisted price	The estimated fair value would increase/decrease if the discounting factor used by investor company is lower or higher
